

XM radio listeners like myself need Instant Traffic and Weather updates. I travel all the time and I can't take the time to search for a local station for these updates. With XM offering these Instant updates I can save time on travel and plan ahead. I am paying for this service therefor I and other XM customers should only have the say so and not NAB!! So please reject the NAB's petition 04-160. When it comes to public safety, money should not be an issue.
